

Airborne/Contact/Eye precautions with N95

Perform hand hygiene before and after entering room

Wear a gown upon entering this room

Wear a N95 mask upon entering this room

Aerosol-Generating Procedure:

Apply a procedure mask over N95 when goggles are used
If faceshield is used, a procedure mask is not required

Wear eye protection when entering this room (Goggles/Faceshield)

Wear gloves when entering this room

Use dedicated or single use disposable patient equipment. When this is not possible, disinfection of common use items is required.

Call Infection Prevention if you have questions
